

A DIVISION OF DOUGLAS DYNAMICS, L.L.C.

SAFETY DEFINITIONS

A WARNING

Indicates a potentially hazardous situation that, if not avoided, could result in death or serious personal injury.

A CAUTION

Indicates a situation that, if not avoided, could result in damage to product or property.

- AVF

NOTE: Identifies tips, helpful hints, and maintenance information the owner/operator should know.

WARNING/CAUTION AND INSTRUCTION LABELS

Become familiar with and inform users about the warning label and instruction label on the back of the blade.

Warning and Caution Label

LOWER BLADE WHEN VEHICLE IS PARKED.

REMOVE BLADE ASSEMBLY BEFORE PLACING VEHICLE ON HOIST.

DO NOT EXCEED GVWR OR GAWR INCLUDING BLADE AND BALLAST.

CAUTION

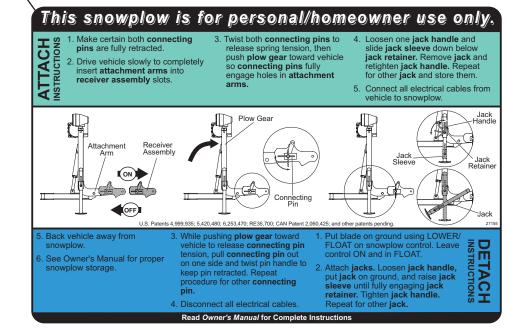

READ OWNER'S MANUAL BEFORE OPERATING OR SERVICING SNOWPLOW.

TRANSPORT SPEED SHOULD NOT EXCEED 45 MPH. REDUCE SPEED UNDER ADVERSE TRAVEL CONDITIONS.

PLOWING SPEED SHOULD NOT EXCEED 10 MPH.

SEE YOUR SALES OUTLET FOR APPLICATION RECOMMENDATIONS.

Instruction Label

SAFETY PRECAUTIONS

Improper installation and operation could cause personal injury and/or equipment and property damage. Read and understand labels and the *Owner's Manual* before installing, operating, or making adjustments.

Lower blade when vehicle is parked. Temperature changes could change hydraulic pressure, causing the blade to drop unexpectedly or damaging hydraulic components. Failure to do this can result in serious personal injury.

Remove blade assembly before placing vehicle on hoist.

The driver shall keep bystanders clear of the blade when it is being raised, lowered, or angled. Do not stand between the vehicle and the blade or within 8 feet of a moving blade. A moving or falling blade could cause personal injury.

Keep hands and feet clear of the blade and A-frame when mounting or removing the snowplow. Moving or falling assemblies could cause personal injury.

A WARNING

Do not exceed GVWR or GAWR including blade and ballast. The rating label is found on driverside vehicle door cornerpost.

A CAUTION

Refer to the Kit Selection Guide/Selection List for minimum vehicle recommendations and ballast requirements.

To prevent accidental movement of the blade, always turn the ON/OFF switch to OFF whenever the snowplow is not in use. The control indicator light will turn off.

PERSONAL SAFETY

- Wear only snug-fitting clothing while working on your vehicle or snowplow.
- Do not wear jewelry or a necktie, and secure long hair.
- Wear safety goggles to protect your eyes from battery acid, gasoline, dirt, and dust.
- Avoid touching hot surfaces such as the engine, radiator, hoses, and exhaust pipes.
- Always have a fire extinguisher rated BC handy, for flammable liquids and electrical fires.

FIRE AND EXPLOSION

A WARNING

Gasoline is highly flammable and gasoline vapor is explosive. Never smoke while working on a vehicle. Keep all open flames away from gasoline tanks and lines. Wipe up any spilled gasoline immediately.

Be careful when using gasoline. Do not use gasoline to clean parts. Store only in approved containers away from sources of heat or flame.

VENTILATION

A WARNING

Vehicle exhaust contains deadly carbon monoxide (CO) gas. Breathing this gas, even in low concentrations, could cause death. Never operate a vehicle in an enclosed area without venting exhaust to the outside.

TORQUE CHART

A CAUTION

Read instructions before assembling. Fasteners should be finger tight until instructed to tighten according to the torque chart. Use standard methods and practices when attaching snowplow including wearing proper personal protective safety equipment.

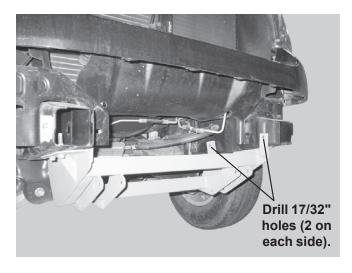

Recommended Fastener Torque Chart (FtLb.)			
Size	SAE Grade 2	Grade 5	Grade 8
1/4-20 5/16-18 3/8-16 3/8-24 7/16-14 1/2-13 9/16-12 5/8-11 3/4-10 7/8-9 1-8	6 11 19 24 30 45 66 93 150 150 220	9 18 31 46 50 75 110 150 250 378 583	13 28 46 68 75 115 165 225 370 591 893
Metric Grade 8.8 (FtLb.)			
Size	Torque	Size	Torque
M 6 M 8 M 10	7 17 35	M 12 M 14 M 16	60 95 155
These torque values apply to fasteners except those noted in the instruction.			

INSTALLATION INSTRUCTIONS

- Detach the rubber splash shield at the bottom edge of the bumper by removing the three plastic fasteners. From the top surface of the bumper, remove the four metric cap screws that attach the plastic trim, hood-release handle, and grille bumper. Also, remove the hood-release cable support. Retain the plastic fasteners and metric cap screws.
- 2. Remove both tow hooks from the front of the frame, and retain the fasteners. The tow hooks cannot be used with the mount installed. Retain the tow hooks for reinstallation if the snowplow is removed.
- 3. If necessary, remove the skid plate, and save the parts for reinstallation if the mount is removed from the vehicle.
- 4. Disconnect the fog lamp harness connections if so equipped.
- 5. Remove and save the four nuts (two on each side of vehicle) from the back surface of the bumper brackets. Slide the bumper forward to remove.
- 6. Position the mount under the vehicle frame. Line up the slotted holes in the mount with the tow hook holes in the frame. Reusing the tow hook fasteners, install the mount to the bottom of the frame, and tighten according to the torque chart.
- 7. Using the four holes in the mount as guides, drill four 17/32" holes in the vehicle frame.

- Place a 1/2" washer onto a 1/2" bolt with handle, and insert the bolt into the truck frame. Pass the bolt out through the hole in the truck frame and the hole in the rear tab of the mount. Place a 1/2" locknut on the bolt, and hand tighten. Repeat on the other side.
- 9. Insert a 1/2" cap screw through each front mount tab and into the frame. Place a 1/2" washer and locknut on the cap screws inside the frame. The locknuts must be placed inside the frame; otherwise, the bumper will not reattach. Tighten all four mount tab fasteners according to the torque chart.
- 10. Reinstall the bumper to its original position using the existing fasteners.
- 11. Reconnect the fog lamp harness connectors if so equipped.
- Reattach the rubber splash shield at the bottom edge of bumper using the original plastic fasteners. At top surface of the bumper, reinstall the four metric hex cap screws, plastic trim, hood-release handle, and grille bumper. Reinstall the hood-release cable support.

NOTE: After five to ten hours of snowplow usage, retorque all mount assembly fasteners.

1233

The company reserves the right under its product improvement policy to change construction or design details and furnish equipment when so altered without reference to illustrations or specifications used. Do not exceed vehicle ratings with a snowplow. The company offers a limited warranty for all snowplows. See separately printed page for this important information.
