INSTALLATION NOTES

1. Vehicle should be parked on a level surface with a normal vehicle load on the FRONT suspension.
2. On some vehicles it may be necessary to raise or stiffen the suspension to decrease the vehicles front suspension sag with the snow plow in place.
3. Unless otherwise specified, mount all Vehicle Mount Kit Components to vehicle before tightening any hardware.
4. It is recommended that LOCTITE®, or similar thread locking product, be used on ALL mounting hardware (i.e. Nuts, Cap Screws, Bolts, etc.).
5. Items in parentheses () refer to quantity required for this step. Items in parentheses with a pound sign (#) indicate the part number as found in the parts list on the last page of this document.
Example: (2) 1/2" Lock Washers (#9).

MOUNTING INSTRUCTIONS

1. Remove the skid plate by removing the (4) screws holding it in place.

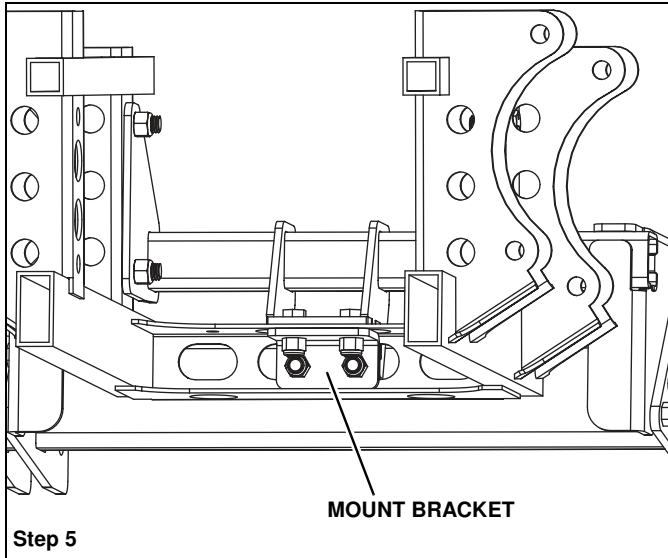

2. Temporarily remove the brush guard by removing the (6) screws hold it in place.

3. Place the Mounting Weldment (#2) on the UTV frame by aligning the four rear holes of the Mounting Weldment (#2) with the four holes in the UTV frame.

4. In those four holes from step 3, Insert (4) 7/16"-14 x 1" Hex Head Cap Screws (#4) and loosely secure with (4) 7/16"-14 Lock Nuts (#5).

- Slide the Mount Bracket (#3) in the UTV frame and align the four holes in the bracket with the four bottom holes in the Mounting Weldment (#2). Once aligned, insert (4) 3/8"-16 x 1" Hex Head Cap Screws (#6) through the Mounting Weldment (#2), UTV frame, and Mount Bracket (#3). Loosely secure with (4) 3/8"-16 Lock Nuts (#8).

- Tighten all installed hardware.
- Re-install the brush guard.
- Align the UTV Mount (#1) with the holes in the Mounting Weldment (#2). Adjust the UTV Mount (#1) so that the center of the bottom slot is 11-12" off the ground.

IMPORTANT: Height from the bottom of the lower pin slots on the UTV Mount to the ground should be between 11" and 12" to ensure proper operation.

- Loosely secure the UTV Mount (#1) with (6) 3/8"-16 x 1-1/4" Hex Head Cap Screws (#7) and (6) 3/8"-16 Lock Nuts (#8).
- Tighten all hardware using the Torque Specification Chart below.
