

Nite Saber[®] LED Lights

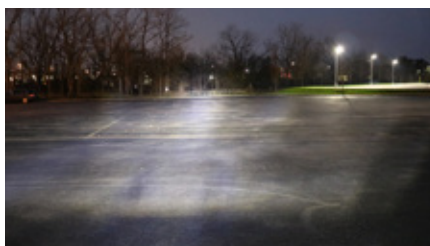

Performance that Outshines the Competition

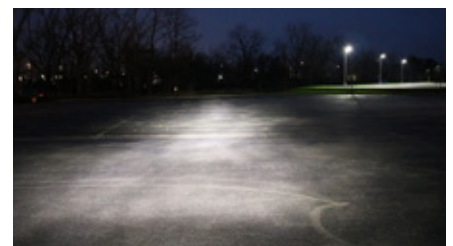

Others say their plow lights are the best...but *we have the proof.*

Recent tests have shown Nite Saber LED lights, operated on high beam, are brighter than any other competitor, especially in the center area that is the most critical when plowing. High beam test results prove the optical clarity of the Nite Saber LED's lens is unmatched in all viewing zones versus the competition.

Unretouched images showing the difference in light output of the Nite Saber LED versus the competition.

Nite Saber LED – HIGH BEAM

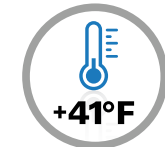

The competition – HIGH BEAM

State-of-the-art design to maximize visibility and safety.

With advanced features and state-of-the-art design, Meyer® Nite Saber LED lights make it easier and safer than ever before.

It's no wonder they outshine the competition.

Smart Sensor

Heat grid activates automatically only at temperatures below +41°F (+5°C)

Features Include:

- 1 Four headlight system**, advanced LED technology and high output harnessing, Nite Saber LED lights provide a far superior forward and right curbside beam pattern for safer, easier and more productive plowing.
- 2 Integrated heat grid** prevents snow and ice buildup.
- 3 Wrap-around turn signal design** makes it easier for other motorists to see you when plowing or driving.
- 4 Large access rear door** makes it easy to replace turn signal bulb when necessary.
- 5 High output harnessing system** ensures that maximum electrical energy is transmitted to the headlight system. Note: LED lights will not work on a positive ground wiring system.
- 6 180-degree adjustable stainless steel bracket** reduces vibration while maintaining maximum lighting in all weather conditions.
